

The Multidisciplinary Approach to Soft Tissue Sarcoma

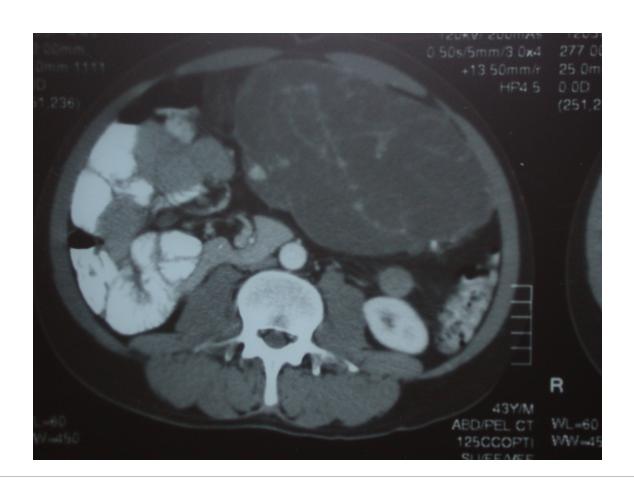

Jeff Wayne, MD
Chief. Division of Surgical Oncology
Professor of Surgery and Dermatology
Northwestern University Feinberg School of Medicine

MRI: Leiomyosarcoma of the Calf

CT: Retroperitoneal Liposarcoma

NCCN Guidelines: Workup

"Prior to initiation of therapy, all patients should be evaluated and managed by a multidisciplinary team with expertise and experience in sarcoma."

NCCN Guidelines, Soft Tissue Sarcoma v2.2016

Limb-sparing Approach

50% amputation rate in 1960's

Currently 5%

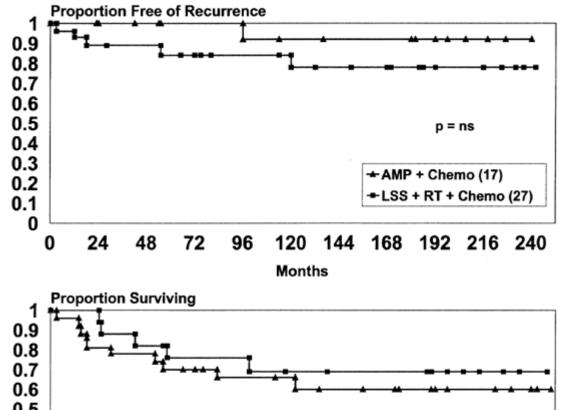

Amputation reserved for tumors not amenable to resection by any other means

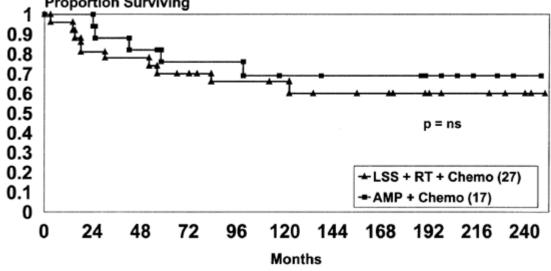

- No evidence of distant metastasis
 Prospective randomized trial (NCI)
- Local recurrence slightly higher (p = 0.06)
- No difference in overall survival (p = 0.75)

Dr. Steven Rosenberg

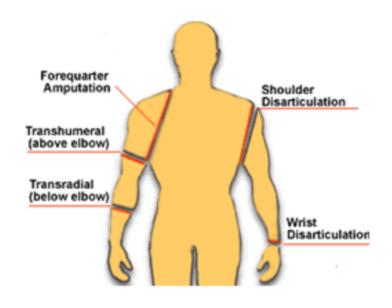

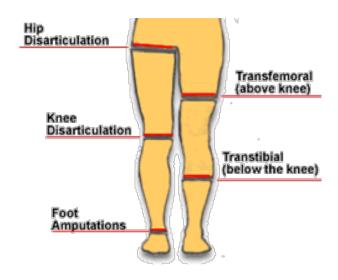

Rosenberg, Et Al., Ann Surg, 1982

Management Strategy

M Northwestern Medicine

Surgical Reconstruction

Limb-sparing approach is facilitated by availability of plastic and reconstructive surgery techniques

- Complex closure
- STSG
- Rotational flaps
- Free flaps

Thank You!
