The SPORE in Prostate Cancer and Lurie Cancer Center are pleased to host a special lecture:

**Causes of Prostate Cancer in Men of African Heritage**

**Timothy Rebbeck, PhD**
Professor of Epidemiology, Department of Biostatistics and Epidemiology, University of Pennsylvania

**Monday, April 29, 2013**
12:00pm-1:00pm
Gray Seminar Room
Robert H Lurie Cancer Research Building
303 E Superior Street, Chicago

Dr. Rebbeck received a B.A. in biology from Northwestern University in 1984, an Sc.M. in chronic disease epidemiology from the Johns Hopkins University School of Hygiene and Public Health in 1986, and an A.M. in statistics and Ph.D. in Human Genetics from the University of Michigan in 1991. His graduate work involved biometrical genetics methods applied to the study of essential hypertension. He subsequently undertook postdoctoral training in the molecular and genetic epidemiology of cancer and birth defects at the Fox Chase Cancer Center. Dr. Rebbeck joined the University of Pennsylvania in 1995. The goal of Dr. Rebbeck’s research is to identify genes associated with the etiology of breast, prostate, endometrial, and skin cancers; evaluate interactions of these genes with each other and with endogenous or exogenous exposures; and to translate this information to studies of cancer prevention and outcome.
